Technisource Names Larry Rogness as Engineering Services Senior Project Manager

CEDAR RAPIDS, Iowa - (August 29, 2006) - Technisource, a national information technology and engineering services provider, has appointed Larry Rogness as a senior project manager for the engineering services team. He will operate from the firm's office in Cedar Rapids and will be responsible for management of outsourcing projects and resource oversight.

"We are very fortunate to have a professional of Larry's caliber join our team," said Brian Dennis, Western region vice president for Technisource. "Larry's project management and technical expertise in mission critical embedded software and systems will be an asset to both current and future clients and will provide Technisource with additional capability in providing managed solutions for full lifecycle real-time embedded systems and software for its clients."

Rogness possesses nearly three decades of project and engineering management experience in aerospace. He most recently served as program manager for custom software development for a computer engineering services company in Cedar Rapids. Previously, Rogness spent a majority of his career with a Fortune 500 aerospace company, where he managed avionics product development for commercial applications.

He has extensive practical experience in system requirements analysis and software requirements definition. Rogness also has a strong working knowledge of RTCA/DO-178B technical standard for level A software criticality and the Federal Aviation Administration certification process. He holds a BS in computer science from the University of North Dakota.
