**TECHNISOURCE INTRODUCES HIGHLY FLEXIBLE WINDOWS 7
MIGRATION SOLUTION**

Combination of proven technology talent and technology service enables flexible delivery models that minimize business impact on an organization during migration

FORT LAUDERDALE, Fla., April 6, 2010 — Technisource, one of the largest technology services providers in North America, today announced the launch of the company's latest technology solution, the Windows 7 Migration service offering. Technisource's experience and expertise allows for the unique ability to support all of the critical success factors during migration to Windows 7. In addition, the company's proprietary planning process minimizes impact on an organization's business end users, IT staff and IT budget.

At the heart of the Windows 7 Migration service offering is Technisource's custom approach, based upon client needs and their unique and specific points of impact. This highly custom and flexible planning process allows for a full turnkey solution or any individual piece in between – enabling organizations to do more with less and maximize IT budget. Technisource's proven methodologies for OS migration include:

- Planning a unique migration path for each client
- Reducing risk of OS migration by understanding the client's unique pain points
- Providing high speed and reliability at the most cost-effective point
- Maintaining user productivity
- Offering world-class support after migration

(more)

"In the highly competitive technology services industry, our advantage continues to be the services that we have wrapped around our talent engine," said Andy Speer, vice president of technology solutions for Technisource. "We were recently awarded a Microsoft Gold Certified Partner status with Desktop Platform Competency. This speaks directly to the success of our process – understand your business first, and then plan the best migration path possible."

Technisource is a Microsoft Gold Certified Partner and the Windows 7 Migration service offering is immediately available to firms with as little as 100 computers to those with more than 100,000.
